Website for Clients

- Create your own project through a UI
- No need for an API

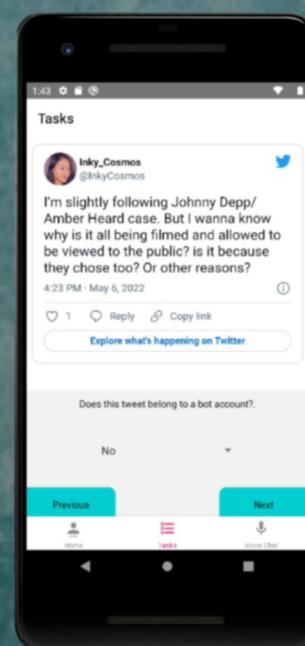

The screenshot shows the client-side web application interface. It includes sections for 'TASK DETAILS' (with fields for Keyword, Hashtag, and Metric Name), 'TASK NAME' (with fields for Task Name, Start Date, and End Date), and 'EXPERT PREFERENCES' (with fields for Max Age, Min Age, Gender selection, and Language selection).

- Create your own metrics
- Automatically scrape tweets with keywords
- Choose the attributes of the experts to work on your project

- Follow the results in real time

Mobile App for Experts

- Work remotely and efficiently as an expert
- Instantaneously collaborate with other experts via voice chat
