Website

- Create your own project through a UI
- No need for an API

The screenshot shows three main sections: 'TASK DETAILS' (with fields for Keyword, Hashtag, and Metric Name), 'TASK NAME' (with a 'Task Name' input field), and 'EXPERT PREFERENCES' (with fields for 'Min Age' and 'Max Age', 'Select a Gender(s)', and 'Select a language').

- Create your own metrics
- Automatically scrape tweets with keywords
- Choose the attributes of the experts to work on your project

- Work as an expert
- Instantaneously collaborate with other experts via voice chat

- Follow the results in real time
